Investment Strategy	<p>The aim of the Scheme is to provide long-term capital growth from a diversified and actively managed portfolio of equity and equity related securities.</p> <p>The Scheme will invest in a range of companies, with a bias towards large and medium market capitalization companies. The Scheme may invest in unlisted and / or privately placed and / or unrated debt securities subject to the limits, from issuers of repute and sound financial standing.</p> <p>As per the asset allocation pattern indicated above, for investment in debt securities and money market instruments, the Scheme may invest a part of the portfolio in various debt securities issued by corporates and / or State and Central Government. Such Government securities may include securities which are supported by the ability to borrow from the treasury or supported only by a sovereign guarantee or of the State Government or supported by Government of India / State Government in some other way.</p>															
Risk Profile of the scheme	<p>Mutual Fund units involve investment risks including the possible loss of principal. Please read the SID carefully for details on risk factors before investment.</p> <p>Standard Risk Factors</p> <ul style="list-style-type: none"> (i) Investments in mutual fund units involves investment risks such as market risk, credit & default risk, liquidity risk, trading volumes, settlement risk, including the possible loss of principal. (ii) As the price/ value/ interest rates of the securities in which the scheme invests fluctuate, the value of your investment in the scheme may go up or down. The various factors which impact the value of the scheme's investments include, but are not limited to, fluctuations in the stock markets, bond markets, fluctuations in interest rates, prevailing political and economic environment, changes in government policy, factors specific to the companies and issuer of the securities, tax laws, liquidity of the underlying instruments, settlement periods, trading volumes etc. 															

KEY INFORMATION MEMORANDUM

- (iii) Past performance of the Sponsor/ AMC/ Mutual Fund does not guarantee future performance of the scheme.
- (iv) BNP Paribas Equity Fund is the name of the scheme and does not in any manner indicate either the quality of the scheme or its future prospects and returns.
- (v) The sponsor / associates are not responsible or liable for any loss resulting from the operation of the scheme beyond the initial contribution of ₹ 1,00,000/- (Rupees One lakh only) to the corpus of the Mutual Fund made by it towards setting up the Fund.
- (vi) The present scheme is not a guaranteed or assured return scheme.

Scheme Specific Risk Factors:

Market Risk: All mutual funds and securities investments are subject to market risk and there can be no assurance / guarantee that the scheme's objectives will be achieved. The securities that the scheme invests in would be exposed to price changes on a day-to-day basis. These price changes may occur due to instrument-specific factors as well as general macroeconomic conditions.

Markets are volatile and can decline significantly in response to adverse issuer, political, regulatory, market or economic developments. The scheme may be subject to price volatility due to factors such as interest sensitivity, market perception, and creditworthiness of issuer and market liquidity.

Different parts of the market can react differently to these developments. The value of an individual security or particular type of security can be more volatile than the market as a whole and can perform differently from the value of the market as a whole.

Risks associated with investing in equities:

The risks associated with investments in equities and similar instruments include significant fluctuations in prices. The impact of fluctuations is likely to be accentuated for short-term investments. The risk that the performance of one or more companies declines or stagnates may have a negative impact on the performance of the Scheme as a whole at any given time.

Stock markets are volatile and can decline significantly in response to political, regulatory, economic, market and stock-specific developments etc. Different parts of the market can react differently to these developments. The stock-specific volatility may also change over a period of time as the characteristic of the stock undergoes a change in terms of market-cap category.

The Scheme may hold such securities for only a very short time, which could tend to increase the costs. The Scheme may invest in growth stocks which may be more volatile than the market in general and may react differently to economic, political and market developments and to specific information about the issuer. Growth stocks traditionally show higher volatility than other stocks, especially over short periods. These stocks may also be more expensive in relation to their profits than the market in general. Consequently, growth stocks may react with more volatility to variations in profit growth.

The Fund Manager may temporarily adopt a more defensive approach if it considers that the equity market or economy is experiencing excessive volatility, a persistent general decline, or other unfavourable conditions. In such circumstances, the Scheme may be unable to achieve or pursue its investment objective.

The Scheme may invest in companies making an initial public offering. In such cases there is a risk that the price of the newly floated share is more volatile due to factors such as the absence of previous trading, unseasonal transactions and the limited number of securities available for trading.

Concentration Risk:

The scheme may pursue only a limited degree of diversification. It may invest a greater proportion of assets in the securities of very few issuers (within the limits permitted by regulation) or be concentrated on a few market sectors. This could have implications on the performance of the scheme. The scheme may be more sensitive to economic, business, political or other changes and this may lead to sizeable fluctuation in the Net Asset Value of the scheme.

Risks associated with investing in fixed income securities:

- Credit and Counterparty risk:

Credit risk or default risk refers to the risk that an issuer of a fixed income security may default (i.e., will be unable to make timely principal and interest payments on the security or honor its contractual obligations).

Counterparty risk refers to the counterparty's inability to honor its commitments (payment, delivery, repayment, etc.) and to risk of default. This risk relates to the quality of the counterparty to which the scheme has exposures. Losses can occur in particular for the settlement/delivery of financial instruments or the conclusion of financial derivatives contracts. The value of a fixed income security will fluctuate depending upon the changes in the perceived level of credit and counterparty risk as well as any actual event of default. If the credit rating of an issue, issuer or counterparty is downgraded this may cause the value of the related debt securities in which the scheme has invested to fall.

The severity of the risk varies depending on the quality of the securities in the scheme. To the extent that the scheme invests in high-yield bonds, this presents a higher than average risk. There are different types of debentures available in the market. Some of them could be more risky. Lower-quality debt securities and certain types of securities involve greater risk of default or price changes due to changes in the credit quality of the issuer. They are not in the first rank of debts in case of default. The value of lower-quality debt securities and certain types of other securities can be more volatile due to increased sensitivity to adverse issuer, political, regulatory, market or economic developments.

- Liquidity Risk:

The liquidity of the scheme's investment is inherently restricted by trading volumes in the securities in which the scheme invests.

A lower level of liquidity affecting an individual security or an entire market at the same time, may have an adverse bearing on the value of the scheme's assets. More importantly, this may affect the Fund's ability to sell particular securities quickly enough to minimise impact cost, as and when necessary to meet requirements of liquidity or to sell securities in response to triggers such as a specific economic/corporate event. Trading volumes, settlement periods and transfer procedures may restrict the liquidity of a few or all of the investments and may affect the liquidity of the investments of the scheme.

The scheme may be unable to implement purchase or sale decisions when the markets turn illiquid, missing some investment opportunities or limiting ability to face redemptions. The lack of liquidity could also lead to the risk that the sale price

KEY INFORMATION MEMORANDUM

of a security could be substantially lower than the fair value of the security.

Treatment and disposal of illiquid securities/NPAs: Such securities will be valued in good faith in accordance with the Valuation Policy. Further SEBI Regulations / provisions (vide SEBI Circular - MFD/CIR/05/432/2002 dated June 20, 2002) shall apply for such securities. Accordingly any amount realized by the mutual fund after the winding up of the schemes from such NPAs and illiquid securities, if substantial and realized within two years shall be distributed back to the investors. In case the amount is not substantial or it is realized after two years, it may be transferred to the Investor Education Fund maintained as specified in SEBI circular MFD/CIR/9/120/2000 dated November 24, 2000. The decision as to the determination of substantial amount shall be taken by the Trustees of Mutual Fund after considering the relevant factors.

- **Interest Rate Risk & Re-investment Risk:**

The value of an investment may be affected by interest rate fluctuations. Interest rates may be influenced by several elements or events, such as monetary policy, the discount rate, inflation, etc. The value of debt and fixed income securities held by the Scheme generally will vary inversely with the changes in prevailing interest rates. In general, price of debt and fixed income securities go up when interest rates fall, and vice versa. Securities of any issuer that has higher duration could be more risky in terms of price movements relative to those with lower duration. Thus any impact of interest rate changes would be higher on securities with higher duration irrespective of the status of the issuer of the security. The investments made by the Scheme are subject to reinvestment risk. This risk refers to the interest rate levels at which cash flows received from the securities in the Scheme are reinvested. The additional income from reinvestment is the "interest on interest" component. The risk is that the rate at which interim cash flows can be reinvested may be lower than that originally assumed.

- **Sovereign risk:**

The Central Government of India is the issuer of the local currency debt in India. The Government raises money to meet its capital and revenue expenditure by issuing debt or discounted securities. Since payment of interest and principal amount has a sovereign status implying least probability of a default, such securities are known as securities with sovereign credit. It also implies that the credit risk on such Government securities is even lower than that on non-government securities with "AAA" rating and hence yields on government securities are even lower than yields on non-government securities with "AAA" rating.

- **Risk associated with investment in unrated instruments:**

The scheme may invest in lower rated/unrated instruments considering the overall risk of the portfolio. This may increase the absolute level of risk of the portfolio. The credit risk & liquidity risk will be relatively higher for lower/unrated instruments as compared to the instruments that have been assigned investment grade ratings. Lower rated/ unrated securities also tend to be more sensitive to economic conditions than instruments that have been assigned investment grade ratings.

- **Risks associated with investing in securitised debt:**

The scheme may invest in domestic securitized debt such as asset backed securities (ABS) or mortgage backed securities (MBS). ABS means securitized debts wherein the underlying assets are receivables arising from personal loans, automobile loans,

KEY INFORMATION MEMORANDUM

etc. MBS means securitized debts wherein the underlying assets are receivables arising from loans backed by mortgage of properties which can be residential or commercial in nature. ABS / MBS instruments reflect the undivided interest in the underlying of assets and do not represent the obligation of the issuer of ABS / MBS or the originator of the underlying receivables. The ABS / MBS holders have a limited recourse to the extent of credit enhancement provided. Securitized debt may suffer credit losses in the event of the delinquencies and credit losses in the underlying pool exceeding the credit enhancement provided. As compared to the normal corporate or sovereign debt, securitized debt is normally exposed to a higher level of reinvestment risk.

Risk associated with investments in derivatives:

The scheme may use various derivative instruments and techniques, permitted within SEBI Regulation from time to time only for portfolio balancing and hedging purpose, which may increase the volatility of scheme's performance. Usage of derivatives will expose the scheme to certain risks inherent to such derivatives.

Derivative products are specialized instruments and can provide disproportionate gains as well as disproportionate losses to the investor. Execution of such strategies depends upon the ability of the fund manager to identify such opportunities. Identification and execution of the strategies to be pursued by the fund manager involve uncertainty and decision of fund manager may not always be profitable. No assurance can be given that the fund manager will be able to identify or execute such strategies.

The risks associated with the use of derivatives are different from or possibly greater than the risks associated with investing directly in securities and other traditional investments.

Risk factors specific to investments in foreign securities:

To the extent that the assets of the scheme may invest in foreign securities, there may be risks associated with currency movements, restrictions on repatriation and transaction procedures in overseas market, lack of complete or reliable information, market irregularities or high taxation. Further, the repatriation of capital to India may also be hampered by changes in regulations or political circumstances. Since the scheme may invest predominantly in foreign securities / markets of certain specific countries, there is a country risk which includes events such as introduction of extraordinary exchange controls, economic deterioration, bi-lateral conflict leading to immobilization of the overseas financial assets, political uncertainty, prevailing laws and policy matters including prevalent tax laws of the respective jurisdiction for execution of trades or otherwise applicable for investments in such securities / markets and the jurisdiction through which settlement of such transactions takes place. The fund shall also be exposed to settlement risk, as the country where investment is made might have different settlement periods. Market risks can be greater with respect to political instability, lack of complete or reliable information, market irregularities or high taxation. As the investment will be in securities, which are denominated in foreign currencies, fluctuation in the exchange rates of the foreign currencies may have an impact on the income and value of the fund. It may be noted that if rupee appreciates, it will lead to reduction in returns to investor. The liquidation of securities where investments will be made by the schemes shall be subject to the liquidity / settlement issues of the country of investment / settlement. Non-business days in country of investment / settlement may impact the liquidity of the scheme's investments. If due to difference in time zone, in case the AMC is

KEY INFORMATION MEMORANDUM

	<p>unable to declare the NAV as per provisions stated in this SID, the acceptance of transactions shall be suspended.</p> <p>Other Risks Other risks including risk associated with inflation, legal risk, taxation risk, valuation risk & operational risk & risk factors associated with processing of transaction in case of investors investing in mutual fund units through Stock Exchange Mechanism as provided in Scheme Information Document.</p> <p>Investors in the Scheme are not being offered any guaranteed returns. Please refer to SID for more details on scheme specific risk factors.</p>
Risk Control Measures	<p>Since investing requires disciplined risk management, the AMC would incorporate adequate safeguards for controlling risks in the portfolio construction process. While allocating and choosing securities, the Investment Manager will aim to diversify by gaining broad exposure to different industries and companies in order to reduce risk. For investments in fixed income instruments, a credit evaluation of each investment opportunity will be undertaken to manage credit risk. The AMC will utilize ratings of recognized rating agencies as an input in the decision making process. The fund manager shall follow the asset allocation pattern in SID under normal circumstances and residual cash may be invested in the collateralized borrowing & lending obligations (CBLO) / repo market, units of mutual fund which seeks to ensure liquidity in the scheme under normal circumstances. There can however be no guarantee against liquidity risk within the Scheme.</p> <p>The AMC may also implement certain internal control procedures / risk exposure limits etc. for controlling risks which may be varied from time to time. The scheme may utilize derivative instruments for hedging & portfolio balancing purposes. All Interest Rate Swaps will be undertaken with approved counter parties under pre-approved International Swaps and Derivatives Association (ISDA) agreements. The scheme may also use various derivatives and hedging products from time to time, as would be available and permitted by SEBI / RBI for the purpose of hedging and portfolio rebalancing.</p> <p>The above risk control measures shall be implemented by the AMC on best effort basis however there can be no guarantee that such measures can completely mitigate the risks involved in scheme.</p>
Plans & Options	<p>The Scheme offers following two plans:</p> <ul style="list-style-type: none"> • BNP Paribas Equity Fund • BNP Paribas Equity Fund - Direct Plan <p>Each Plan offers Growth and Dividend Options. The Dividend Option offers Dividend Payout and Dividend Re-investment facilities.</p> <p>There shall be a single portfolio under the scheme.</p> <p>Growth Option: The Scheme will not declare any Dividend under this Option. The income attributable to Units under this Option will continue to remain invested in the Option and will be reflected in the Net Asset Value of Units under this Option.</p> <p>Dividend Option: Under Dividend Option, the dividend, if any, shall be declared by Trustees from time to time.</p> <ul style="list-style-type: none"> - For Dividend Payable of ₹ 500/- or less: Automatic Reinvestment. - For Dividend Payable of more than ₹ 500/- : Option to choose between Payout and reinvestment.

Expenses of the Scheme

a. Load Structure

Entry Load : Nil

Exit Load:

- 1.00%, if redeemed or switched-out upto 1 year from the date of allotment of units.
- Nil, if redeemed or switched-out after 1 year from the date of allotment of units.

The above load shall also be applicable for all Systematic Investment Plans, Systematic Transfer Plans, Systematic Withdrawal Plans. No load will be charged on dividend re-investment units and bonus units. No exit load will be charged on switches between options of the same plan of the Fund. Please refer the section "Direct Plan" for load structure for switches within the Plan.

In accordance with the requirements specified by the SEBI circular no. SEBI/ IMD/ CIR No. 4/ 168230/09 dated June 30, 2009 no entry load will be charged for purchase/additional purchase/ switch-in accepted by the Fund. The upfront commission on investment made by the investor, if any, shall be paid to the ARN Holder directly by the investor, based on the investor's assessment of various factors including service rendered by the ARN Holder. The exit load charged, if any, shall be credited to the scheme.

The AMC reserves the right to modify the load structure on a prospective basis.

b. Recurring Expenses

Estimated annual recurring expenses [% per annum of daily net assets]

As per Regulation 52(6)(c)(i) of SEBI (MF) Regulations, the total fungible expenses including investment management and advisory fee and other allowable expenses shall be subject to the following percentage limit of daily net assets:

- (i) On the first Rs. 100 crore of the daily net assets 2.50%;

KEY INFORMATION MEMORANDUM

- (ii) On the next Rs. 300 crore of the daily net assets 2.25%;
- (iii) On the next Rs. 300 crore of the daily net assets 2.00%;
- (iv) On the balance of the assets 1.75%

Direct Plan shall have a lower expense ratio excluding distribution expenses, commission, etc. and no commission for distribution of units will be paid / charged under Direct Plan.

Further, the following costs or expenses may be charged to the schemes:

- (a) Expenses not exceeding 0.30 per cent of daily net assets, if the new inflows from beyond top 15 cities are at least –
 - (i) 30 per cent of gross new inflows in the scheme, or;
 - (ii) 15 per cent of the average assets under management (year to date) of the scheme, whichever is higher:

Provided that if inflows from such cities is less than the higher of sub clause (i) or sub- clause (ii), such expenses on daily net assets of the scheme shall be charged on proportionate basis.

Provided further that expenses charged under this clause shall be utilised for distribution expenses incurred for bringing inflows from such cities.

The top 15 cities shall mean top 15 cities based on Association of Mutual Funds in India (AMFI) data on ‘AUM by Geography - Consolidated Data for Mutual Fund Industry’ as at the end of the previous financial year.

The said additional expenses on account of inflows from beyond top 15 cities so charged shall be clawed back in the scheme, in case the said inflow is redeemed within a period of 1 year from the date of investment.

- (b) Additional expenses under Regulation 52 (6A) (c), not exceeding 0.20 per cent of daily net assets of the scheme.
- (c) The AMC may charge service tax on investment and advisory service fees (‘AMC Fees’) which shall be borne by the Scheme in addition to the total expense ratio;
- (d) Brokerage and transaction costs includes service tax incurred for the purpose of execution of trade and is included in the cost of investment that shall not exceed 0.12 per cent (12 bps) in case of cash market transactions and 0.05 per cent (5 bps) in case of derivatives transactions.

It is clarified that the brokerage and transaction cost incurred for the purpose of execution of trade may be capitalized to the extent of 12bps and 5bps for cash market transactions and derivatives transactions respectively. Any payment towards brokerage and transaction cost, over and above the said 12 bps and 5bps for cash market transactions and derivatives transactions respectively may be charged to the scheme within the maximum limit of TER as prescribed under regulation 52 of the SEBI (Mutual Funds) Regulations, 1996. Any expenditure in excess of the said prescribed limit (including brokerage and transaction cost, if any) shall be borne by the AMC or by the trustee or sponsors.

Investors should note that the total recurring expenses of the scheme excluding issue or redemption expenses, whether initially borne by the Mutual Fund or by the AMC, but including the investment management and advisory fee, shall not exceed the limits as prescribed under Regulation 52 of the SEBI (MF) Regulations. Subject to the SEBI (MF) Regulations, expenses over and above the prescribed ceiling will be borne by the AMC.

For the actual current expenses being charged, the investor should refer to the

KEY INFORMATION MEMORANDUM

website of the mutual fund. The mutual fund would update the current expense ratios on the website within two working days mentioning the effective date of the change.

These estimates have been made in good faith as per the information available to the Investment Manager based on past experience and are subject to change inter-se. Types of expenses charged shall be as per SEBI (MF) Regulation.

Actual expenses for the financial year 2014-15:
Total recurring expense as a % to daily net assets :

- Distributor Plan - 2.67%
- Direct Plan - 1.79%

An Illustration of impact of expense ratio on Scheme's returns:

If an investor A invests in a regular plan of a Scheme with an expense of 2% p.a. and an investor B invests in Direct Plan of the same scheme with an expense of 1% p.a. Assuming the gross return of this fund is 10% for that given year, investor A will make a return of 8% (post expense) for that year, whereas investor B will make 9% return for same period.

Also, please take a look at below illustration which shows impact of different expense ratio assumed on initial investment of Rs. 10,000 invested over period of 10 years with an average annualized gain of 10% p.a.
